## Best Disc Cleaner For Mac

An addition of new end-user features was not a primary goal. Mac OS X 10.7 was publicly unveiled on June 8, 2009, at the Apple Worldwide Developers Conference.. 6, the second longest time span between successive Mac OS X releases Unlike previous versions of Mac OS X, the goals with Mac OS X 10.. 7 were improved performance, greater efficiency and the reduction of its overall memory footprint.. Mac OS X 10.7 is the recent major release of Mac OS X, Apple's desktop and server operating system for Macintosh computers.. On August 28, 2009, it was released worldwide and was made available for purchase from Apple's website and its retail stores at the price of US\$29 for a single-user license.. As a result of the low price, initial sales of Mac OS X 10.7 were significantly higher than that of its predecessors.

The release of Mac OS X 10.7 came nearly two years after the introduction of Mac OS X 10.
